Ginkgo

Designed by Jehs+Laub

The silhouette of Ginkgo is beautiful from all angles. The sculpted bent plywood shell makes a very impressive design statement. New technology in plywood engineering enabled Jehs+Laub to craft a chair with complex curves, thin lines, and optimum strength. The curvature of the shell along with the pitch of the back delivers comfort in an inviting form. Enhance the comfort by adding an upholstered seat or back insert. The bent plywood base elevates Ginkgo's presence from a stacking side chair to an elegant guest pull up chair.
