Ruckus product story

Foster student engagement

Ruckus enables the type of movement essential to cognitive development and learning. With Ruckus, users can choose how they sit, learn and interact. Ruckus uniquely adapts to user preference, versus traditional design that forces users to adapt to furniture.

360° SEATING – “AS YOU LIKE IT”

With an infinite range of sitting positions, Ruckus chairs feature integrated arms that also serve as a work ledge in reverse. This non-directional seating improves sightlines and supports peer-to-peer or student-to-teacher engagement, enhancing outcomes in learning and performance.

Enable **diverse** teaching styles

With options for mobility and height-adjustability, Ruckus energizes students and instructors alike with responsive design. Ruckus brings students together in flexible and transitional learning spaces, while offering instructors the freedom to teach as they prefer.

ORGANIZE THE CHAOS

Constantly evolving tools and technology, combined with lowered levels of formality, require flexible yet highly functional storage elements within learning spaces.

Adapt to users and uses

Shake up the learning space and respond to change with minimal disruption. Ruckus creates adaptable learning spaces that transition with ease when change is needed.

CHANGE ON-THE-FLY: FOCUSED TO INTERACTIVE

Easily reconfigure Ruckus tables and desks to support group interaction or individual focused work.
