

# Tek Vue

A glass office-front system that features a universal platform, allowing users to specify, plan and install within an evolving workplace. The system focuses on single-center glazing and thin-profile frames, taking up minimal space. It's easy to install and uses materials efficiently while offering specification flexibility. Pivot and barn door frames are not specific to individual door leaves, hardware or ceiling heights, allowing for easy placement anywhere on the floorplan.

## MINIMAL REAL ESTATE

---
