

Teknion partners with Finnish company Naava to reconnect office workers with nature, creating healthier, happier and more inspiring workplaces. More than a beautiful living wall, Naava Healthtech Green Wall is scientifically proven to naturalize indoor air, reduce harmful chemicals and optimize humidity. The wall brings the benefits of nature indoors and can contribute to WELL certification.

Naava is a health technology company founded in 2012 to reconnect humanity with nature in the built environment. Combining technology, nature and Scandinavian design, the company sources plants from a Florida-based greenhouse to develop intelligent green wall products that clean and purify air in a natural biological way that yields fresher, healthier indoor air.

People at work spend much of the day indoors, cut off from the physical and emotional benefits of nature and fresh air. Peer-reviewed scientific studies show that Naava refreshes and naturalizes the air in a space to help people feel more energized and alert, healthier and happier.

how do you bring
6,000 plants into the office

beauty of plants, power of biofilters

naava one

- Appropriate for open offices, conference rooms, personal workspaces, creative and leisure spaces
- A freestanding, mobile piece of furniture that can also be used as a room divider
- Color options: painted aluminum, white or black
- Standard size: 40" w x 91" h x 14" d [other sizes available by special order]
- Enables air purification of up to 645 sq.ft.

naava one slim

- Only 8" deep, the slim version of Naava One can be placed in narrower spaces; ideal for conference rooms and busy spaces such as cafes
- Color options: painted aluminum, white or black
- Wall-secured
- Standard size: 40" w x 91" h x 8" d
- Enables air purification of up to 645 sq.ft.

naava duo

- Double-sided design features plants on both sides
- Color options: painted aluminum, white or black
- When serving as a room divider, its lush greenery reduces noise, improving space acoustics
- Standard size: 40" w x 91" h x 20" d [other sizes available by special order]
- Enables air purification of up to 645 sq.ft.
